NUMBER 068

ESTABLISHED JANUARY 1, 1989

FEBRUARY 2011

PRODUCTION ORDER ERROR

Serial Number 6800277

On October 5, Gale Downer registered serial number 6800277 listing the engine number as S2149. When I checked my data base, I found that the engine number showed S2194. I thought Gale might have transposed the last two digits. However, I had included a note on the production order indicating that S2194 was the same engine number for serial number 6800267. Thus both 6800267 and 6800277 both showed S2194 as the engine number.

We are fortunate that this car has survived and that Gale took the time to register it with us. I suppose that 50+ years after the fact, it isn't all that important, but as long as we have the correct information, I felt obligated to document it. And, it helps fill up the white space in the newsletter.

V-8 Emblem

Where Does It Belong?

I asked Gale to recheck the engine number and sure enough, he had listed it correctly as **S2149**.

Here is Gale's reply:

In reference to the engine # on my car, 6800277, I can say the engine # is most definitely S2149. Apparently the Last 2 numbers on the production order were reversed.

Since the engine is still in the car, it is obvious the production order is in error. You can see on the original production order, that the engine number listed is prominently displayed as S2194.

During the course of converting the original production orders to my data base, I noticed several errors. In fact, the very first two production orders for 6030001 and 6030002 showed the engine numbers as K1001 and K1002 respectively, even though both cars had automatic transmissions. These should be S1001 and S1002. I later found that engine number K1001 was on serial number 6030104 and K1002 was on 6030534.

The V-8 emblem was introduced very late in the model run, with Engineering Master Change Notice.. 22312 on 04-12-1956. In the field titled, "When Effective", were the words, "As soon as possible". Thanks to Richard Quinn for supplying this information

V-8 emblem used on Hawks

The first car with that 04-12-1956 Final Assembly Date was Serial Number 6032710. It is doubtful that any cars from that date were fitted with the new emblem. It may have taken several days or even weeks for the change to enter production, especially if the emblems had to be ordered.

V-8 emblem, driver's side

indicates the emblem had a "Chrome Plate" finish.

The Part Number for C-K models was 1314806W. Oddly there was a different Part Number 1314805W for the emblem used on sedans and wagons. The "W" on the end of the Part Number

However, I have never seen any documentation that indicates where the emblem should be placed. I've seen photos of cars with the emblem on the front fender in front of the wheel well, as well as on the fin. If you have an Authenticity Guide, the description on page 12 states, "The most accepted location is under the Studebaker fender script". It appears that this may be in error.

V-8 emblem, passenger side

A r o u n d November 16, 2010, several owners informed me about a car up for auction on Ebay. The listing indicated Serial Number 6033404 with an odometer reading of 38,006.8 miles. I wrote to the

seller, asking about the car and received the following reply:

- - - - -
A lady owned it however it was in Wayne Woods name. my email is lhemeway@westmetroauto.com we are selling this for the owner. thanks Lloyd - westmetroauto

Although I contend that no 1956 Golden Hawk is original after more than half a century, this one probably comes as close as any. The Final Assembly Date was August 13, 1956. Therefore, some time during the production of the prior 700 cars, built between April 12 and August 13, the V-8 emblem was added to all the cars.

Trunk Floor Color

That same car described above brought up another question asked by Bill Ladroga.

A question came up while I was looking at the photos of the eBay 56J. I'm assuming that this is a late car out of South Bend and the color looks like it may be one of the Spring colors, Rosebud, with Snowcap white trim. The car is supposed to be all original with 38K miles on it.

As I look at the shots of the trunk, I see that the trunk pan is painted Rosebud and the insides of the fenders are the usual light grey that I'd expect. I've always thought that the trunk pans in all 56Js were grey too, just like the fenders. Any thoughts?

I don't have an answer for that. I always thought the entire trunk was painted gray also. At Studebaker, it was pretty much "anything goes". I suppose it's possible the trunk floor color was changed late in the model run. If the trunk floor matched the body color, I would suspect the entire floor pan would also match.

Trunk floor painted Rosebud
 Wheel well painted Gray

Studebaker introduced six new two-tone color combinations in April 1956. These are listed below with the number of cars produced shown in parenthesis.

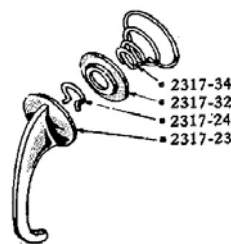

- P5664 Rosebud/Snowcap White (21)
- P5665 Snowcap White/Redwood (56)
- P5666 Redwood/Snowcap White (8)
- P5667 Seaside Green/Midnight Black (5)
- P5668 Daybreak Blue/Cambridge Gray (1)
- P5669 Snowcap White/Yellowstone (9)

At the same time, P5642 Tangerine/Snowcap White was dropped from the paint option list.

Door/Window Hardware

Plastic Escutcheon?

A question from owner Ray Martin caused me to do some checking in the parts manuals. This question has come up before with my friend's 1957 Golden Hawk. I've seen some cars that have a plastic escutcheon about 3/8" thick, between the door handle/window crank and the interior panel. I don't believe these plastic escutcheons were used on the Golden Hawk in 1956.

A check of the parts manual revealed the following:

The inside door handles have a thin metal separator (2317-32 PN 1312647) that goes between the handle and the spring. See section 2317B. The parts manual indicates that this was true for all 1956-1958 C-K models.

The inside window handles also have the same thin metal separator (2320-97 PN 1312647) that goes between the

handle and the spring. See section 2320F. The parts manual indicates that this was true for all 1956-1958 C-K models. However, it also lists an escutcheon, PN 1319242 for 1958-K7 (Golden Hawk) models.

In either case, there should be no plastic escutcheon between the handle and the panel on 1956 Golden Hawks.

1/43 Scale Model 1956 Golden Hawk

From Motor City U.S.A.

In the last issue, I wrote about Motor City U.S.A and the company's desire to produce a 1/43 scale model of the 1956 Golden Hawk. Gene Parrill wrote to me on July 29, 2010 asking for the names of owners in the Los Angeles area. He wanted to take car measurements. The owner of the company, Jeff Thomas, would be in charge of the project.. The three of us corresponded over the next two weeks.

Then on November 05, 2010, I received a phone call from Jeff and we had a lengthy conversation concerning the effort to build the scale model. Things would be moving slowly at first, but once much of the preliminary work is completed, Jeff expects things will move at a faster pace.

1/43 scale models have traditionally been priced somewhat higher than other size scale models. In checking around the Internet, I have learned that Motor City models are of excellent quality, though rather pricey. I did not find a single negative comment or review.

These will not be a mass produced item, will have a low production total, perhaps less than 200. Motor City U.S.A. is a smaller company, and Jeff assures me that the result will be something of which we will all be proud. Jeff also alluded to some rather interesting options that may become available later in the run. Much depends on the amount of acceptance for the model.

Jeff could not give any kind of time frame or expected completion date as there are simply too many variables with which to contend. This is especially true during the early phase. However, over the next series of newsletters, I will try to provide updates as I become aware of them.

Renewal Time

The Four Year Rule

Since I don't collect yearly dues, I have no way of knowing when someone sells the car, no longer wants to be on our Register, or has passed away and the family has no interest in our Register. To help keep my records up to date, I will send you a renewal registration if we haven't

corresponded in the past four years.. If you receive one, you can let me know your situation. Here's how:

1. Complete and return the form by mail.
2. Send an Email to me,
3. Call me and leave a message.

Once I receive your answer, you will be registered for another four years, or dropped at your request.

If you do not return the form, I will be forced to drop you from the mailing list. You will no longer be listed as an owner, and the car(s) will go into my "unknown" file.

Update - Want Ads

I've sent messages to most of the people who have an ad on our web site and in the newsletter to see if the ad is still valid. Please check the ads and if you have one listed that you would like to update or remove, please let me know.

Mail Bonding

Letters are always welcome. If you need help or can offer advice, share it with other owners. (Edited as required.)

Stephanus Booyan October 18, 2010

I don't know if you read all the mail you receive or respond to them, but I've got a short story to tell so I'm going to tell it anyway.

My Name is Stephanus Booyen and I live in Pretoria South Africa. My father passed away almost 3 years ago and I believe he registered his car with you, since I still receive your newsletter on his old email address. He bought his car in 2007 in America and had it shipped to South Africa. He started with the restoration but passed away in a plane crash about 2 months into the build. The serial # is 6031561 and the body # is 1936. I had to finish the car for him, and got it done about a year and a half ago. Three weeks after he passed away DHL delivered a 352 Packard engine sub assembly and I had no idea why.

On completion of the restoration I noticed a bearing knock in the engine and that eventually explained the new engine. I started struggling with the ultramatic gearbox, being the only 56J in the country. I had to try and import all the parts and rely only on the service manual for help. I could not find all the parts I needed so I modified a TH 350 and I haven't looked back since.

My dad was a true lover of Studebakers. Including the Golden Hawk he had 9 Studs in good running order. Including a 1927 Erskine, 1929 Commander, 1936 Dictator coupe and 1949 Commander starlight coupe.

The reason I am contacting you is because I want to rebuild the original engine and get it back in the car to keep its original numbers.

I found a site that sells engine rebuild kits for Packards called Kanter.com. Would you recommend their parts or rather someone else's? And should I consider overhauling the Ultramatic gearbox for the sake of originality or does it not really matter that much? I attached a few photos of my car as it is now.

Thanks for your time and hope to hear from you soon.

Doug Jackman November 13, 2010

From time to time I see questions concerning the correct ride height of a 56J, so thought I'd toss in my two bits worth. When I restored our car, I bought what was possibly the last set of NOS front and rear springs from Newman & Altman (ca 1996). These were not reproductions, and had the Studebaker part numbers stamped on them. These were the heavy duty springs (pns 536513 rear, and 526125 front). Consequently, I've attached a photo of the car sitting on level ground (that's all we have around here) with the tires (BFGoodrich Silvertowns, 7.10X15) inflated to 30 psi (psig, for you engineers).

The distance from the lower surface of the wheel well moldings to the ground was 27-5/8" front, and 24-3/8" rear.

Keep in mind that the restoration is 10 years old (first shown at Madison in 2000) but I

don't think the car has settled very much if any.

Maybe someone would find this of interest. I'm just saying that's what my car measures, not that it should be established as a standard.

Doug Button November 19, 2010

I've heard of you and your site over the years, but finally have the opportunity to join. The 56J has been one of my favorites, partly from stories my Dad had, about one of his friends who had one.

I am developing a company as a hobby now, but hopefully to grow into a more substantial resource for classic car enthusiasts. You can visit my website at www.timemachines.co. If you would like, you can put a link to it from the 56J site. I am continually trying to build my inventory, and services. The radiator repair may be a service that is not readily available elsewhere. Use it how you think appropriate.

You can also see pictures of my cars on that website. One is in the "Garage", the other in the "Parts Department." The second car I purchased from a gentleman in rusty, but original condition. Bringing it home, I was involved in an accident and the trailer the car was in rolled. I then found the first one in St. Louis. Thanks for your efforts!

Jay T Prater November 27, 2010

Had intended to send a note, but lot's has been happening. On Thur. the 11th. I had a bad fire at my shop and lost everything. Ten vehicles in all including the 56 Stude. The others were , 46 Ford Conv., 51 Ford Conv., 61 Chev Conv., 49 Ford pickup and a 49 Ford 2 door. The 51 and the 61 were near completion and perfect cars. The 46 and pickup also perfect and 75% finished. Also lost my daily driver 05 Dodge Ram quad cab, 40 K and excellent, in addition to a restored 49 Ford 8-N tractor. To top it all off, no insurance!

Had to scrap plans to make the Turkey Run. Really hated to miss it, but so goes life I guess.

So hope you got to make the show. A guy named Jim called yesterday inquiring about the 56. Somebody that you may know.

I might advertise the 56 as is, engine is likely ok, carbs melted as usual. Some body panels may be salvaged. Car has a solid floor pan other than minor rust in front passenger floor. Trunk area very solid. Door bottoms were perfect.

Dwain Grindinger December 11, 2010

I will gladly answer Bill Oller's question. Interestingly, the '56 shop manual says the limit is .100" over for these drums whereas .060" is more the industry standard. In fact, the next time this specification is shown is in the '59 manual where it has changed to .060".

Factory Short Blocks: Sure, the 56J engines were available as factory replacement 'short blocks', meaning an assembled block with pistons, rods, crank cam,

bearings, etc. but without cylinder heads. A block fitted with pistons only, or even just a bare block is also in the parts books. Apparently there were a lot of complete engines intended for installation on either Packard's or Studebaker's assembly line that were bought by the old Standard Surplus Co. I would expect none of these blocks, short blocks, or complete engines were stamped.

Nick Nichols **December 12, 2010**

I had a question about fuel pumps for the 56J that I was hoping you could answer. Does the 56J use a fuel pump with a long straight arm or one with a bent arm. I looked at a Packard catalog and it shows two different pumps can be used for the 352 engine. When I bought my 56J it had an electric pump. I wanted to go original so I bought a rebuilt pump but it never worked. This pump has the long straight arm. I used the electric pump for years but still longed for an original pump. I found out recently about the two different pumps. Are these two pumps interchangeable for the 56J or does it take only one type? Any info greatly appreciated. thanks.

Here We Grow Again

Since the newsletter is now posted on the web site, we will no longer print addresses and phone numbers. If you move, please remember me when you send your change of address information.

Administrative "Assistance"

NOTE: Special notes and recurring items.

EMAIL CLUTTER: I easily get 100s of messages a day, most of which are useless and interfere with the more important items. **Please do not send junk mail to me.** This includes anything not 56J related, especially jokes, E-cards, political nonsense and religious items. Believe me, if you send it, I'll get it from 10 others also. Too much aggravation for me!!!

56J ONLY Message Forum Started by owner Scott Reid in July, 2002. A method for owners and fans to exchange ideas. Go to our web site and click on *56J ONLY Message Forum*. Then follow the instructions to sign in or join.

NOTICE: *If you want to contact me, or to include something in the newsletter, you must send it to me directly. You can do so through the 56SGHOR web site. NEVER write me at the Yahoo address.*

56J ONLY, Electronic Version The "E" version of the newsletter is in color, and undamaged in transit. If you would like to receive the newsletter electronically, *and save me a buck*, just let me know and send your Email address. I will send you a notice whenever the latest version is posted on the web site. You can read it, download it, and/or print it at your leisure.

Anyone with an Email address on file with me, will automatically receive the newsletter electronically. **Please let me know if you prefer to receive it by mail.** The mangling, ripping, and stains are free.

Wheel Estate

Due to our infrequent printing schedule, many ads may be quite old. Please let me know if the transaction has been completed.

Cars

Wanted: 1956 Golden Hawk with Standard/Overdrive transmission in finished or near-finished condition. Contact: Ron rstid@yahoo.com (12/2010)

Wanted: Clean or restored (but no resurrected rust please) 56J only with T-85 and No Power Steering and No Power Brakes. Slight modifications, i.e. Caribbean 2X4 intake (or 374 engine) and Twin Traction are welcome. Keith Langendorfer KL4215@att.com 203-683-8406 (12/2010)

For sale: 56 Golden Hawk #6033058. Mechanical restoration done, including brakes. Five new tires. All original parts. Set of 56 wheel covers and a set of 57 wheel covers. Needs paint and interior. \$7500. Snohomish, WA. Fred C. Howard, 360-568-1488, galaxie500@roadrunner.com (12-2010)

For sale: 1956 Golden Hawk, 6031268, Packard engine with two fours, Overdrive on the column, no power steering and no power brakes but complete. Runs but

needs restoration. \$4995. Gary Shaw, Tennessee, home 423 257-8235, cell 423 426-1356. (07-2010)

Other

For sale: Many used 56 J Parts, Hawk doors and rear quarters. Call for needs. Many Studebaker Parts Available. K Body Window Flipper Restoration Services, Stainless steel straightening, polishing. Very Good 56 Golden Hawk Hood. Dwayne Jacobson, 2620 Lake View Drive, Junction City, WI 54443 715-204-0258 studebaker56j@mac.com (12-2010)

For sale: Set of near perfect fins. I restored 2 56J's using three cars. The third car was junked due to frame and body issues but it did have good fins and stainless (no usable check marks) and other parts. The fins were carefully retored, primed and ready to install. Will consider offers but shipping might be costly because of size and packing requirements. I will deliver parts free to York. renda1007@yahoo.com (12-2010)

Wanted: High tone horn for my 56J. Bill Ladroga, (941) 378-7070 ladroga@juno.com (12-2010)

For sale: Packard Oiling System Parts and Upgrades For sale: **Just** found a stash of 1998 manufacture NOS Packard V8 hydraulic valve lifters. These were made by Johnson, a major OEM supplier, before they went out of business. To get enough for my use, I had to buy two cases, 234 units. Will sell them to my '56J friends for \$9.00 each. For comparison, most major Packard suppliers are asking \$14-16 each. **Cam Retainer Plate and Spacer** - The factory engineers redesigned the oiling system to ameliorate the lifter clatter problems. The second-design cam retainer plate and spacer has been remanufactured in A2 tool steel and is now available. Don't rebuild your Packard V8 without it. - \$75. **Oldsmobile V8 Oil Pump Conversion Kit** - \$210, Oldsmobile V8 Standard Duty Oil Pump and Pickup - \$100, Oldsmobile V8 High Volume Oil Pump and Pickup - \$150, **Packard Engineering Oil Pump Relief Valve Dump Tube** - \$25, **Re-Manufactured Packard Oil Pump** - Vacuum Pump replaced by a 1/2" cast iron bottom plate and triple the bearing area - \$350 and exchange of your pump. **Neoprene Rear Main Seal** - \$25, **Re-enforced Front Balance Damper and Neoprene Seal** - \$100 and exchange of your damper. **Rebuilt Water Pumps** with improved seal and bearing. - \$100 and exchange of your pump, **Send cashier's check**, money order or PayPal to: Jack Vines, 3227 E. 28th Avenue, Spokane, WA 99223, PackardV8@comcast.net Studebaker-Packard V8 Limited, 509-535-8610 (12-2010)

1956 Golden Hawk Window Price Sticker
The design is based upon the general design of stickers which were actually done during the period 1959 thru 1966. Send \$40 along with serial number and options/accessories which were originally on your car (a copy of the production order would be very helpful.) If your car has been repainted and options/accessories added or deleted and you want the sticker to reflect the car as it is now just include the information. I have all of the prices. Questions, telephone 708-479-2658 or Richard Quinn 20026 Wolf Rd. Mokena, IL 60448. rtq11@aol.com

In this Issue

- **Gale Downer** provides information correcting a production order error.
- **Stephanus Booyesen** has taken over the restoration of his father's 1956 Golden Hawk.
- **Doug Jackman** sends information on the ride height of his 1956 Golden Hawk.
- **1956 Golden Hawk on EBay** may have solved the question of where the V8 emblem, introduced in April 1956, was positioned on the front fender .
- **Bill Ladroga** reported the trunk floor color on a low mileage Ebay car was painted body color instead of gray.
- **Ray Martin** asks about the plastic escutcheon on the door handles and window cranks.
- **Motor City U.S.A.** continues with its plans to produce a 1/43 scale model of the 1956 Golden Hawk.
- **Doug Button** purchased a 1956 Golden Hawk which was in an accident while being towed home.
- **Dwain Grindinger** provides some thoughts on items that appeared in previous issues.
- **Jay T Prater** tells his tale of woe regarding the destruction of his 1956 Golden Hawk.
- **Nick Nichols** asks about the two different fuel pumps used on the Packard V-8 engine..
- **Renewal time** If we haven't corresponded in the last four years, you will receive a renewal notice. You must respond or you will be dropped from the mailing list.
